

VEA will enable your organization to manage your Enterprise Architecture strategy, programs and initiatives. Our approach combines practical objectives, architecture planning, business process performance, and information management to optimize your people, systems and technology. VEA drives your company to analyze, design and communicate priorities and processes for intuitive decision-making in order to achieve key business objectives and implement "Practical EA" for results.

## Enterprise Business Value

Strategic objectives and goals should always drive the management of your enterprise architecture initiatives. You must utilize technology solutions that can be easily communicated within the business. Your organization must focus on delivering value from the EA repository. VEA accelerates the implementation and management of your EA programs with invaluable enhancements:

- Standards and Guidelines Documents
- Database Structure, Filters and Templates
- Pre-selected Model Types, Objects, Connections, Attributes and Symbols
- Pre-defined Attribute Group Views
- EA Reference Semantic Checks

## VEA Enterprise Architecture Solution

Successful Enterprise Architecture requires an understanding of your business processes and their relationship with the technology portfolio to provide you with competitive advantages. The EA initiatives driven by the VEA Solution enables clients to create real value from their enterprise repository with an effective framework:

- Leverage perspectives to guide business and technology value decisions
- Visualize domain-specific objectives and business value perspectives
- Deliver process improvements with strategic IT consolidation
- Define and deliver business value scorecards
- Define process and system relationships across organization layers
- Optimize Enterprise Architecture content development with automated modeling tools

**VEA Services and Solutions will ensure the success of your Enterprise Architecture Strategy.**

## Enterprise Architecture Services

**VEA's experienced consultants provide:**

- Enterprise Architecture Program Management
- Governance and Competency Centers
- Strategic Architecture and Transition Planning
- Business Process Architecture
- Application and Technology Architecture
- Information Architecture

All of these areas are critical components for an enterprise architecture program that provides executive management with the platform for project prioritization and investment risk analysis.
