

VEA Solution Accelerators empower you to leverage your platform investment and deliver results faster. Strategic objectives and goals drive the management of your business and enterprise architecture initiatives. An effective repository means more than just creating database models. You must drive technology solutions that can be easily communicated with the business. VEA Solutions demonstrate business value using our project management and enterprise architecture real-world experience.

VEA Administration Solution

Long-term success of your EA or BPM initiatives requires effective management and governance of your central ARIS repository. The VEA Administration Solution enables your organization to increase visibility and focus on analysis by significantly reducing time required for manual database management activities. Our accelerator addresses the most common issues such as data duplication, attribute management, user control, and repository analytics, while working within your existing framework to quickly consolidate and optimize your model, object and connection information.

VEA ADMINISTRATION ACCELERATOR

- Database Administration Summary
- Database Assignment Analysis
- Object Duplication Analysis
- Repository Attribute Management
- User Activity
- User Rights

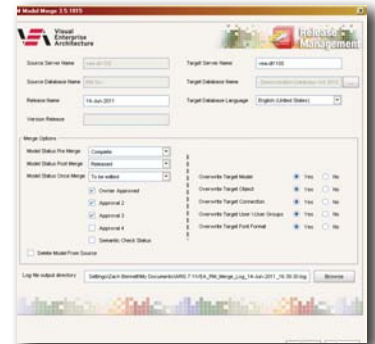

VEA RMLite Solution

Effective governance of your ARIS repository content requires an easy-to-use methodology for promoting your development environment content to production. The RMLite Solution Accelerator provides your team with an easy-to-use, simplified interface and flexible methodology to automate and support the model promotion process. By controlling the end-to-end release process with our configurable macros, reports and approval criteria, you will remain one step ahead, ensuring the quality and availability of the repository among all your different environments.

VEA RM LITE ACCELERATOR

- Model Status Management
- Owner Approval and Semantic Check
- Database and Server Release Manager

Virtual Professional Services with VEA
